PERSONAL PROJECTS

Interfaz de Egresados del CU Costa Sur — *University project*

The purpose of this application is to track the university graduates. As the UdG has many campuses, each has their own administrative people, CUCSUR use to track graduates via excel, so they published an announcement to create a system using web interface and sql database to migrate all the excels into the new application. This app was developed with PHP for Backend, and HTML, JS, and Bootstrap for Frontend.
